QUESTION 1

HOTSPOT

Your company wants to create a help desk system and implement Dynamics 365 Customer Service.

The company has the following requirements:

1.

Provide an application to allow support team staff to chat live with a customer.

2.

Automatically import data from a Microsoft Excel spreadsheet once a day.

3.

Provide a chatbot that can assist customers who need support.

You need to determine which applications to use to meet the requirements.

Which applications should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Requirement	Application
Automatically import data from a Microsoft Excel spreadsheet once a day.	<div>▼</div> <div>Custom Connector</div> <div>Azure Data Lake</div> <div>Power Automate</div> <div>Power BI</div>
Provide a chatbot that can assist customers who need support.	<div>▼</div> <div>Power Virtual Agent</div> <div>Power Automate</div>

QUESTION 2

HOTSPOT

A company plans to use Power BI to visualize data from business systems. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

<div> <div></div> <div> You can display data aggregates and raw data in a Power BI Report. </div> </div>	<div> <div>Yes</div> <div>No</div> </div> <div> <input type="radio"/> <input type="radio"/> </div>
<div> <div></div> <div> You can display related data from multiple sources in the same Power BI Report. </div> </div>	<div> <input type="radio"/> <input type="radio"/> </div>

Clearer pictures and no water-mask in the Premium Product

Correct Answer:

You can display data aggregates and raw data in a Power BI Report.

Yes

☒

No

☐

You can display related data from multiple sources in the same Power BI Report.

☐☒

Clearer pictures and no water-mask in the Premium Product

QUESTION 3

You are creating visuals in Power BI.

You create area charts, pie charts, and donut charts that use your company's data.

You need to display the charts to others at the company.

Which two objects can you add the charts to? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Power BI service
- B. Power BI reports
- C. Power BI desktop
- D. Power BI dashboards

Correct Answer: BD

Reference: <https://docs.microsoft.com/en-us/power-bi/visuals/power-bi-visualization-types-for-reports-and-q-and-a>

QUESTION 4

DRAG DROP

You plan to use Power Automate to monitor what people are saying about your company's products. You store the feedback for research and development purposes.

You need to recommend Power Automate components to use for the solution.

To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Components

action

expression

service

trigger

Answer Area

Requirement	Component
Retrieve the top five posts from your company's Facebook page.	Component
Enter the resulting posts into the product database.	Component
Combine author and link fields into a single field.	Component
Run flow Clearer pictures and no water-mask in the Premium Product	

Correct Answer:

Components

action

expression

service

trigger

Answer Area

Requirement

Component

Retrieve the top five posts from your company's Facebook page.

action

Enter the resulting posts into the product database.

action

Combine author and link fields into a single field.

expression

Run flow **Clearer pictures and no water-mask in the Premium Product**

trigger

Box 1: Action

An action is something that occurs as a result of the workflow. For example, send an email or copy a file. In this case, the action is to retrieve the top five posts from a Facebook page.

Box 2: Action

An action is something that occurs as a result of the workflow. For example, send an email or copy a file. In this case, the action is to insert records into a database.

Box 3: Expression

Sometimes users just need to do basic operations like getting the current time, adding numbers together, or replacing a part of a string of text. That's possible inline in any flow action. Microsoft Flow leverages the same Workflow Definition

Language used by Azure Logic apps. For new users who are unfamiliar with the expression language, there is an inline help experience that shows how to use each expression as they build out their flow.

Box 4: Trigger

A trigger is something that triggers or starts the workflow. It could be a new file uploaded to a document library, a new item created in the list or an email sent to your Inbox – something that will start (kick-off the workflow).

There are two types of triggers:

1.

Automatic trigger is pre-programmed into the workflow based on a certain rule (i.e. new document or item created, email sent, etc.)

2.

Manual Trigger is a trigger initiated by a user. Unlike with automatic trigger above, the workflow will only start when initiated manually by the end user (for example, from the Document Library for a selected file). Manual trigger is only supported for certain types of workflows (i.e. Get feedback from your manager for the selected file)

QUESTION 5

This question requires that you evaluate the underlined text to determine if it is correct.

You have a Power Apps app. You create a new version of the app and then publish the new version. A customer goes through the process of restoring the previous version of the app. In the Version tab for the app, you will see two versions of the app.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. one
- C. three
- D. four

Correct Answer: C

Restore a canvas app to a previous version in PowerApps.

1.

Open powerapps.com, and then click or tap Apps in the left navigation bar.

2.

Near the right edge, click or tap the info icon for the app that you want to restore.

3.

Click or tap the Versions tab, and then click or tap Restore for the version that you want to restore.

4.

In the confirmation dialog box, click or tap Restore. A new version is added to your list.

QUESTION 7

DRAG DROP

A company plans to implement Power BI.

The company wants to implement some specific features that Power BI does not include.

You need to recommend solutions for the company.

What should you recommend? To answer, drag the appropriate solutions to the correct requirement. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Microsoft AppSource	Evaluate solutions that meet current gaps in Power BI capabilities.
Microsoft Lifecycle Services	
Microsoft Azure Marketplace	Evaluate the services of multiple companies to identify a partner that can assist in building a proof-of-concept solution.
Clearer pictures and no water-mask in the Premium Product	

Correct Answer:

Microsoft AppSource	Evaluate solutions that meet current gaps in Power BI capabilities.
	Microsoft Lifecycle Services
	Evaluate the services of multiple companies to identify a partner that can assist in building a proof-of-concept solution.
	Microsoft Azure

QUESTION 8

HOTSPOT

You are creating a canvas app that will be used in several countries/regions.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
Canvas app authoring environment will adapt to the language setting of the author.	<input type="radio"/>	<input type="radio"/>
When running a canvas app on a mobile device, the app adopts the app author's language.	<input type="radio"/>	<input type="radio"/>
Numbers and dates in Power Apps app automatically conform to the regional and language settings for a user's device.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statement	Yes	No
Canvas app authoring environment will adapt to the language setting of the author.	<input checked="" type="radio"/>	<input type="radio"/>
When running a canvas app on a mobile device, the app adopts the app author's language.	<input checked="" type="radio"/>	<input type="radio"/>
Numbers and dates in Power Apps app automatically conform to the regional and language settings for a user's device.	<input checked="" type="radio"/>	<input type="radio"/>

Reference: <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/global-apps>

QUESTION 9

HOTSPOT

You have version 1.0.0.0 of a published Power Apps app. You create and publish version 2.0.0.0 of the app. A customer goes through the process of restoring the previous version of the app.

How many versions of the app are displayed in the Version tab for the app? To answer, select the appropriate option in the answer area.

Hot Area:

Answer Area

You will see  versions of the app.

Clearer pictures and no water-mask in the Premium Product

Correct Answer:

Answer Area

You will see  versions of the app.

QUESTION 10

HOTSPOT

A user is trying to understand the differences between the various ways apps can be built by using Power Apps.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
You can embed canvas apps in model-driven apps.	<input type="radio"/>	<input type="radio"/>
A Power Apps portal can use only one data source.	<input type="radio"/>	<input type="radio"/>
You must use Power BI to create reports in model-driven	<input type="radio"/>	<input type="radio"/>

Clearer pictures and no water-mask in the Premium Product

Correct Answer:

Answer Area

Statement	Yes	No
You can embed canvas apps in model-driven apps.	<input checked="" type="radio"/>	<input type="radio"/>
A Power Apps portal can use only one data source.	<input type="radio"/>	<input checked="" type="radio"/>
You must use Power BI to create reports in model-driven	<input checked="" type="radio"/>	<input type="radio"/>

Clearer pictures and no water-mask in the Premium Product

Box 1: Yes

You can create a canvas app and then embed that within a model driven app.

Box 2: No

With the capability to build a portal in PowerApps, you can create a website for external and internal users enabling them to interact with data stored in Common Data Service.

Note: Common Data Service lets you securely store and manage data that's used by business applications. Data within Common Data Service is stored within a set of entities. An entity is a set of records used to store data, similar to how a

table stores data within a database. Common Data Service includes a base set of standard entities that cover typical scenarios, but you can also create custom entities specific to your organization and populate them with data using

Power

Query. App makers can then use PowerApps to build rich applications using this data.

Box 3: Yes

To get started building a report you'll need the latest version of Power BI Desktop and a PowerApps environment with the latest version of the Common Data Service.

QUESTION 11

You create a set of dashboards and reports for a project team that combines data from different sources in Power BI. Some of the data is considered sensitive.

You need to distribute the dashboards and reports securely to the team.

What should you create?

- A. a custom data connector
- B. a published app
- C. a Microsoft flow
- D. a Power BI workspace

Correct Answer: B

Reference: <https://docs.microsoft.com/en-us/power-bi/service-how-to-collaborate-distribute-dashboards-reports>

QUESTION 12

HOTSPOT

You create a model-driven app. You need to determine which customization can be made to table forms.

Hot Area:

Statements

Yes No

A form can be made visible only to users who have been assigned a specific security role.

☐ ☐

The label of a column on a form can be different than the column display name.

☐ ☐

You can edit the system view named Quick Find to change the title and subtitle displayed for records in a look-up column.

☐ ☐

Clearer pictures and no water-mask in the Premium Product

Correct Answer:

Statements

Yes No

A form can be made visible only to users who have been assigned a specific security role.

☒ ☐

The label of a column on a form can be different than the column display name.

☒ ☐

You can edit the system view named Quick Find to change the title and subtitle displayed for records in a look-up column.

☐ ☒

Clearer pictures and no water-mask in the Premium Product

QUESTION 13

A company uses Dynamics 365 Customer Service. The company uses a manual process to manage call escalations.

You must use Power Automate to automate the process for routing escalated calls.

You need to create the flow.

Which type of connector should you use?

- A. Microsoft Excel
- B. Common Data Service
- C. Office 365 Users

Correct Answer: B

QUESTION 14

DRAG DROP

You create a Power BI dashboard.

Match each option to its function. To answer, drag the appropriate option from the column on the left to its function on the right. Each option may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Select and Place:

Products	Requirement	Product
Share	Ensure that coworkers can see the dashboard.	
Embed	Display data from Microsoft Excel in the dashboard.	
Get Data	Add a report tile to the dashboard.	
Pin		
Import		

Clearer pictures and no water-mask in the Premium Product

Correct Answer:

Products	Requirement	Product
	Ensure that coworkers can see the dashboard.	Share
Embed	Display data from Microsoft Excel in the dashboard.	Get Data
	Add a report tile to the dashboard.	Pin
Import
